

3.6.3 - Programme

Garland type	arrangements	description
GS 2		for upper and return set with two rollers
GS 3		for upper and impact set with three rollers
GS 5		for upper and impact set with five rollers
Suspension brackets and connections		for upper and return sets

3 Troughing sets "garland" series GS2

The diameters and types of rollers in the table are those advised for suspended sets with two rollers, for different widths of belt.

The diameter of the roller is chosen from those possible for the type of roller considered (see chapter 2 rollers) and must be suitable for the speed and load capacity of the belt (see chapter 2 para. 2.3 selection method).

Rollers that may be utilised to comprise the "garland" GS2 must be from the series PSV, PL, PLF, and where needed, with return rings (see chapter 2, rollers with rings).

3 Troughing sets "garland" series GS5

The diameters and types of rollers in the table are those advised for suspended sets with five rollers, for different widths of belt.

The diameter of the roller is chosen from those possible for the type of roller considered (see chapter 2 rollers) and must be suitable for the speed and load capacity of the belt (see chapter 2 para. 2.3 selection method).

Rollers that may be utilised to comprise the "garland" GS5 must be from the series PSV, PL, PLF, exceptionally, and only where absolutely necessary, with impact rings (see chapter 2, impact rollers).
